

John Misterovich

Photography for me has been a long-time passion. I shoot primarily landscapes, nature, and black & white.

I enjoy all aspects of the photographic process, the planning and visualization of the shot, the click of the shutter, and the post production of the image.

My photographic goals are to capture interesting and creative photos, and to have the viewer enjoy the final image, be it on screen or as a framed photograph.

Photography provides the opportunity to focus on and appreciate the beauty of this world, and to hopefully capture that beauty with the camera.
